

# **Beyond Revolution: Revelation**

By Dr. Michael Obsatz – October 2025

What happens when there is a big revolt against oppression, and those revolting don't do their inner work? The oppressed become the oppressors. Killing Native Americans followed the U.S. Revolution in 1776.

What is the revelation? It is inner spiritual work that results in those experiencing it to feel loved, lovable and loving. So, there is a movement from Empire Consciousness to Oneness Consciousness.

Empire is about hierarchy, domination, power over, competition, scarcity, fear, addiction and shame.

Oneness is about connection, love, compassion, empathy, collaboration, abundance, and freedom.

Revolution is an outside job, external change. Revelation is an inside job, internal change. Without Revelation, there will never be inner or outer peace.
